

Dinel Group BV was founded in April 2000. We are a Netherlands-based consultancy firm focused on the recruitment of highly skilled technical professionals for the Oil & Gas, Infrastructure, Petrochemical, Energy and Offshore industries.

Over the past years we have successfully recruited technical experts, for assignments to our valued clients in the above mentioned fields.

We are expanding our hiring activities by reaching out to “knowledge migrants” in the global labour market.

Hiring of ‘Knowledge Migrants’

Why & How...

Why are we opening our doors to knowledge migrants? The reason is obvious: the shortage of highly skilled technical professionals in the Netherlands. There are many unfilled technical positions in our country. The Dutch authorities have therefore opened the doors to foreign workers (EU & non-EU citizens) who have special skills to offer to the Netherlands.

Why does Dinel Group BV want to recruit knowledge migrants? So that we can strengthen our business relationships with our valued clients by providing them with dynamic, reliable, competent and – most importantly – highly skilled foreign manpower, alongside our existing local professionals.

How do we fulfil our mission? By sourcing a large number of potential foreign professionals whom we can recommend to our major clients.

How do we fulfill a complete service to our valued clients in hiring Knowledge Migrants? by including all the necessary arrangements pertaining to their mobilization in the Netherlands (e.g. IND procedures, visa application, accommodation & more.)

How can we become partners? If you are an expert in one of the mentioned technical fields, please send us your resume and credentials, so that we can immediately start a mutual beneficial business relationship.

How can we assist you? We have a multicultural internal organisation with personnel drawn from a range of nationalities, who are more than willing to deal with your enquiry and find the best job placement for you.

Please do not hesitate to contact us. We will be delighted to help you advance your technical career in the Netherlands.

Technical professionals know how
